DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on May 11, 2010 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

3. Claims 13-24, 36-65, 67-69, 85, and 92 are allowed as amended by applicant in the claims submitted January 7, 2010.

4. The following is an examiner's statement of reasons for allowance: The claims in this application have been allowed because the prior art of record fails to teach or disclose, either singly or in combination, the claimed device of a metering pump system having a storage chamber; a dispensing outlet; a metering chamber movable between a contracted and an expanded state, wherein movement of the metering chamber from its contracted state to its expanded state results in the metering chamber being placed in fluid communication with the storage chamber in order to receive a volume of fluid product in excess of the desired dose amount; a bleed mechanism for bleeding the

Art Unit: 3763

excess volume; and a boundary wall formed by a portion of the container unit, wherein movement of the metering chamber from its contracted state to its expanded state causes a pressure differential between the metering and storage chambers which results in the fluid product being drawn into the metering chamber.

5. The closest prior art of record is Martin (USPN 5,085,351). However, this reference fails to teach, disclose, or render obvious the invention as claimed or described above.

6. Regarding independent claim 13, the closest prior art of record fails to teach among all the limitations or render obvious that movement of the metering chamber from its contracted state to its expanded state causes a pressure differential between the metering and storage chambers which results in the fluid product being drawn into the metering chamber in combination with all other limitations of the claimed invention.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
